

ZOHAIB AHMED

AI / ML Engineer • Developer • CS Student

zuhibali111@gmail.com • +92 326 9281246 • Sukkur, Pakistan • zohaib-portfolio-website.vercel.app • github.com/xizohaib

PROFILE

AI/ML-focused developer and Computer Science undergraduate specializing in building end-to-end AI-powered applications — from training and evaluating ML models to shipping them inside production-style systems. Experienced integrating LLM APIs (Gemini) into real-time, voice-driven applications, and comfortable across the MERN stack and Python data science tooling. Completed Coursera's Deep Learning Specialization, including transformer architectures.

TECHNICAL SKILLS

AI / Machine Learning	Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn — classification models, data preprocessing, feature engineering, model evaluation
Deep Learning	Neural networks, CNNs, Transformer architectures (Coursera Deep Learning Specialization)
AI / LLM Integration	Gemini API (function calling), Whisper (speech-to-text), TTS pipelines, prompt engineering
Languages	Python, Java, JavaScript
Backend	Node.js, Express.js, Flask, FastAPI
Frontend	HTML, CSS, JavaScript, React.js
Database	MongoDB (incl. Atlas), MySQL, SQL
Tools & Deployment	Git, GitHub, Streamlit, Vercel, JWT Auth, REST APIs

PROJECTS

AI-Based Interview Preparation System | Full-Stack + AI

github.com/xizohaib/Ai-based-Interview-Preparation-System

- Built a full-stack platform (React, Flask, MongoDB Atlas / MySQL) with authentication and a course dashboard to help users prepare for technical interviews.
- Designed backend using an app-factory pattern, SQLAlchemy models, and JWT-based route protection; documented API with a Postman collection.

Mini Assistant — AI Voice Assistant | Python, Speech AI, LLM Integration

- Built a Windows voice assistant combining faster-whisper (speech-to-text), the Gemini API with function calling for task execution, and edge-tts for natural voice responses.
- Solved real production issues: model deprecation handling, Windows file-lock errors during audio cleanup, and robust temp-file management.

Titanic Survival Prediction | Machine Learning + Streamlit App

github.com/xizohaib/Titanic-Survival-Prediction

- Trained a Random Forest classifier on the Kaggle Titanic dataset and deployed it as an interactive Streamlit web app.
- Designed a custom nautical-themed UI with glass-morphism cards and animated, dynamic progress indicators for live predictions.

Loan Default Prediction System | Machine Learning

github.com/xizohaib/loan-default-prediction

- Built a classification model to predict loan defaults, covering data preprocessing, feature engineering, and model evaluation with scikit-learn.

Full-Stack Web Applications (MERN) | Notes App, Todo App, Weather App

github.com/xizohaib

- Developed a set of full-stack MERN applications (MongoDB, Express, React, Node.js) covering CRUD operations, REST API design, third-party weather API integration, and responsive UI.

CERTIFICATIONS

- Front-End Developer Certificate — Coursera / Google
- Google AI Fundamentals — Coursera / Google
- Deep Learning Specialization — Coursera / DeepLearning.AI

EDUCATION

Bachelor of Science in Computer Science

Sukkur IBA University • Expected Graduation: 2028
